

About this bracelet: This bracelet was made by a Zuni silversmith.

The design represents the sun. Silver, coral, turquoise and jet were set down into the shaped bezels or channels of silver in a style called “channel work.”

Instructions: Color the bracelet using blue (turquoise), white (shell), red (coral), and black (jet). Then cut it out carefully along the outside solid lines. Cut up to the dot on the *single* dotted line you can see on the left side of the bracelet.

Notice that there are *three* dotted lines on the other end of the bracelet. These will allow you to fit the band to your wrist size. Start by cutting the dotted line closest to the end, marked “Large.” This will make a large bracelet. If you want the band smaller, try cutting on the next dotted line. If you have a small wrist and use the smallest size, you may want to cut off the extra cut at the end.
